Re: Analyst – Investment Banking, Infrastructure

Dear Guggenheim Securities Infrastructure Team,

I'm applying for the Analyst role in the Infrastructure Investment Banking group in New York. I'm an MBA Finance (STEM) candidate at Fordham Gabelli, and before that I worked at JPMorgan Asset Management, Lenovo and Thomson Reuters. Infrastructure, especially power and data centers, is the sector I want to build a career in, and the posting's description of small client teams on M&A and capital raising is the kind of exposure I'm looking for.

On modeling and valuation, I valued J.M. Smucker in my MBA coursework with comps, a DCF checked against a sell-side model, and an LBO. I also modeled a 6-project, 35.4 MW Illinois solar portfolio, covering capital structure, DSCR, NPV and levered IRR, and compared debt structures to recommend a phased green loan + ABS approach. Professionally, at Lenovo I built forecasts and scenario analyses that improved capital efficiency by 15%, and at JPMorgan Asset Management I built models to evaluate $10M in marketing-channel budget deployment.

My valuation work has been in coursework rather than on live deals, so I'd be learning execution on the job. What I bring is careful modeling, clear presentation materials, and a real interest in infrastructure. I'd welcome the chance to talk.

Sincerely,
Sam Dasgupta
